## No. 29.—Monthly Production Statistics—New South Wales.

## Quantities of Certain Articles Manufactured and Mined.

The following statistics of production are obtained principally by means of returns collected monthly from producers by the Government Statistician of N.S.W. in conjunction with the Commonwealth Statistician. The figures for 1949-50 are subject to revision on receipt of annual returns. Production from June to August, 1949, was affected by an industrial dispute in coal mines and power restrictions. Particulars in this table have been revised since last issue on the basis of annual returns for 1948-49.

\* Nine private trading banks (shown above), the Commonwealth Bank (other than Central Banking), three State Banks, branches of three foreign banks and two other banks. Comparable figures for the Commonwealth Bank are not available prior to September, 1945.

† Since January, 1949, technical changes by certain banks in method of compilation have had the effect of reducing deposits (not bearing interest) and advances by like amounts (the amounts in months of change were approximately £9m. in January and £2.6m. in July, 1949).

‡ In Nine Trading Banks, the increases after June, 1947, consist mainly of short-term loans from central bank.

§ Not available.

\*The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

†The index represents the ratio of each month's clearings (calculated on a three months' moving average) to the average for the corresponding period in the years 1926 to 1930 (taken as 100 in each month). The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels.

**No. 81.—Stock Exchange Index (Sydney).**

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total 75 Companies. *	34 Active Shares included in foregoing.

## No. 83.—Employment in New South Wales—Wage and Salary Earners in Civil Employment, Governmental and Private.

(1) The estimates shown below are based on the Census of 1933 and subsequent quasi-censuses (e.g., Civilian Register, 1943, and Occupation Survey, 1945), and returns supplied monthly by governmental authorities and since July, 1941, by employers for purposes of Commonwealth Pay-roll Tax. (2) The number of employees recorded on Pay-roll Tax returns relates to those whose names appeared on the last pay-roll of the month irrespective of whether they were actually working at the end of the month. (3) Working proprietors, wage earners in rural industry, female domestics in private households, members of defence forces at home or abroad and Government "relief" workers are not included.

**No. 87.—Wholesale Price Index-Numbers—Basic Materials and Foodstuffs.**

(Compiled by the Commonwealth Statistician.)

The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

**No. 88.—Export Price Index-Numbers—Australia.**

(Compiled by the Commonwealth Statistician.)

These index-numbers are compiled from the prices of 20 commodities which constitute at present about 80 per cent. of all exports. The prices of the commodities are multiplied by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.
